

**SafetyChoice®**  
G4000 PERS Features

- The built-in speakerphone allows hands-free, two-way voice communication within seconds after pendant is activated.
- The PERS has both visual and audible alarm indicators, which are perfect for both hearing and visually impaired subscribers.
- Rechargeable backup battery and warning signals indicate low battery and electrical AC power failure.
- Lightweight, waterproof button is located on pendant or wristband.
- Friendly, caring, well-trained professionals provide outstanding service.

PERSONAL EMERGENCY RESPONSE SYSTEM

## Senior Safety in a Compact Model

The *SafetyChoice*® Personal Emergency Response System (PERS) is a medical alarm with hands-free, two-way communication that can preserve seniors' independence while offering an immediate response in the first critical moments of an emergency.

The PERS comes equipped with a waterproof button, worn as a lightweight pendant or wristband. With the simple push of a button, a caring, well-trained care representative will immediately answer the call and stay on the phone until help arrives.

The system operates for up to 24 hours with a rechargeable backup battery in the event of a power failure. It also sends a warning signal for a low battery. The client's *Comfort Keeper*®, and whomever else you wish, will be notified of emergency alerts, and alert activity reports are available to help keep healthcare providers informed.

**We offer a variety of PERS types to fit your lifestyle:**

Personal Emergency Response System G2000 	Cellular PERS 	Fall Sensor 
Personal Emergency Response System G4000 	Home and Yard PERS 	Go Anywhere PERS
